- (d) willful

RC

Dolphins are regarded as the friendliest creatures in the sea, stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the ~~scientists have~~ community, as we do. Some suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favours of man's superiority over them, is that we can kill them more easily than they can kill us is the least satisfactory, on the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

Dolphins are regarded as the friendliest creatures in the sea, stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the scientists have community, as we do. Some suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favours of man's superiority over them, is that we can kill them more easily than they can kill us is the least satisfactory, on the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

It is clear from the passage that dolphins

- (a) are the most powerful creatures that live in the oceans ✗
- ☒ (b) have a reputation for being friendly with humans.
- (c) are proven to be less intelligent than once thought. ✗
- (d) are capable of learning a language and communicating with humans. ✗

Dolphins are regarded as the friendliest creatures in the sea, stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the scientists have community, as we do. Some suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of there mammals be more intelligent than man? Certainly the most common argument in favours of man's superiority over them, is that we can kill them more easily than they can kill us is the least satisfactory, on the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

The fact that the writer thinks that we can kill dolphins more easily than they can kill us

- (a) proves that dolphins are not the most intelligent species. 
- (b) means they are better adapted to their environment than we are 
-  (c) does not mean we are superior to them
- (d) show that they have a sophisticated form of communication

Dolphins are regarded as the friendliest creatures in the sea, stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the scientists have community, as we do. Some suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favours of man's superiority over them, is that we can kill them more easily than they can kill us is the least satisfactory, on the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

One can infer from the reading that

- (a) dolphins are quite abundant in some areas of the world. ☒
- (b) it is not usual for dolphins to communicate with each other. ☒
- ☒ (c) dolphins have some social traits that are similar to those of humans.
- (d) dolphins have skills that no other living creatures have such as the ability to think.
