- Idioms & Phrases – 5

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. As yet, no government programmer has discovered how to store this water. 'Dying Wisdom', a seven-year countryside study by Delhi's Centre for Science and Environment, reveals that ruins of amazing ancient technologies survive in every corner of India. Drip-irrigation systems of bamboo pipes in Meghalaya; 'kunds', underground tanks in Rajasthan; 'pynes', water channels built by tribals in Bihar; and thousands of open-water bodies down south are all superb examples of rainwater harvesting systems. Even today, tanks called 'eris' in Tamil Nadu water one-third of the state's irrigated area. Unfortunately, governmental planners mostly refuse to acknowledge the potential of these low-cost systems, concentrating on costly dams and canals. Few cities have lost touch with their ecological traditions as fast—and with as damaging results—as Bangalore. Only 17 of its water bodies struggle to survive in a city where once 200 lakes, ponds and wetlands cooled the city and recharged its ground water. The threats continue unabated as the relentless march of urbanization shows no sign of stopping.

'This grave problem' in the passage refers to

- a) Short monsoon span
- b) Rainfall
- c) Storage of water
- ✓ d) Water crisis

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water the crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. As yet, no government programmer has discovered how to store this water. 'Dying Wisdom', a seven-year countryside study by Delhi's Centre for Science and Environment, reveals that ruins of amazing ancient technologies survive in every corner of India. Drip-irrigation systems of bamboo pipes in Meghalaya; 'kunds', underground tanks in Rajasthan; 'pynes', water channels built by tribals in Bihar; and thousands of open-water bodies down south are all superb examples of rainwater harvesting systems. Even today, tanks called 'eris' in Tamil Nadu water one-third of the state's irrigated area. Unfortunately, governmental planners mostly refuse to acknowledge the potential of these low-cost systems, concentrating on costly dams and canals. Few cities have lost touch with their ecological traditions as fast—and with as damaging results—as Bangalore. Only 17 of its water bodies struggle to survive in a city where once 200 lakes, ponds and wetlands cooled the city and recharged its ground water. The threats continue unabated as the relentless march of urbanization shows no sign of stopping.

What, according to the passage, is the primary reason for the water shortage?

- a) Lack of means to store rainwater
- b) Government's ignorance of the situation
- c) Less rainfall in the country
- d) Carelessness of people in using water

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water the crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. As yet, no government programmer has discovered how to store this water. 'Dying Wisdom', a seven-year countryside study by Delhi's Centre for Science and Environment, reveals that ruins of amazing ancient technologies survive in every corner of India. Drip-irrigation systems of bamboo pipes in Meghalaya; 'kunds', underground tanks in Rajasthan; 'pynes', water channels built by tribals in Bihar; and thousands of open-water bodies down south are all superb examples of rainwater harvesting systems. Even today, tanks called 'eris' in Tamil Nadu water one-third of the state's irrigated area. Unfortunately, governmental planners mostly refuse to acknowledge the potential of these low-cost systems, concentrating on costly dams and canals. Few cities have lost touch with their ecological traditions as fast—and with as damaging results—as Bangalore. Only 17 of its water bodies struggle to survive in a city where once 200 lakes, ponds and wetlands cooled the city and recharged its ground water. The threats continue unabated as the relentless march of urbanization shows no sign of stopping.

Which State uses bamboo pipes for the drip irrigation system?

(a) Bihar

☒ (c) Meghalaya

(b) Rajasthan

(d) Tamil Nadu

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. As yet, no government programmer has discovered how to store this water. 'Dying Wisdom', a seven-year countryside study by Delhi's Centre for Science and Environment, reveals that ruins of amazing ancient technologies survive in every corner of India. Drip-irrigation systems of bamboo pipes in Meghalaya; 'kunds', underground tanks in Rajasthan; 'pynes', water channels built by tribals in Bihar; and thousands of open-water bodies down south are all superb examples of rainwater harvesting systems. Even today, tanks called 'eris' in Tamil Nadu water one-third of the state's irrigated area. Unfortunately, governmental planners mostly refuse to acknowledge the potential of these low-cost systems, concentrating on costly dams and canals. Few cities have lost touch with their ecological traditions as fast—and with as damaging results—as Bangalore. Only 17 of its water bodies struggle to survive in a city where once 200 lakes, ponds and wetlands cooled the city and recharged its ground water. The threats continue unabated as the relentless march of urbanization shows no sign of stopping.

Which of the following is not a low cost technology in water usage?

- (a) water channels
- (b) drip-irrigation
- (c) underground tanks
- (d) dams and canals

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. As yet, no government programmer has discovered how to store this water. 'Dying Wisdom', a seven-year countryside study by Delhi's Centre for Science and Environment, reveals that ruins of amazing ancient technologies survive in every corner of India. Drip-irrigation systems of bamboo pipes in Meghalaya; 'kunds', underground tanks in Rajasthan; 'pynes', water channels built by tribals in Bihar; and thousands of open-water bodies down south are all superb examples of rainwater harvesting systems. Even today, tanks called 'eris' in Tamil Nadu water one-third of the state's irrigated area. Unfortunately, governmental planners mostly refuse to acknowledge the potential of these low-cost systems, concentrating on costly dams and canals. Few cities have lost touch with their ecological traditions as fast—and with as damaging results—as Bangalore. Only 17 of its water bodies struggle to survive in a city where once 200 lakes, ponds and wetlands cooled the city and recharged its ground water. The threats continue unabated as the relentless march of urbanization shows no sign of stopping.

The people in ancient India had amazing technology to harvest water. This shows that

- a. they understood the significance of water.
- b. it used to rain heavily.
- c. they did not know how to build dams.
- d. water was scarce at that time.

A great water scarcity looms over India; by 2025 Indians will get just over half the water they get today. This grave problem has a simple solution. Catch the rain as it falls, and the water crisis will disappear. However, about 80 per cent of India's rainfall buckets down during the three months of the monsoons. Idioms & Phrases.

A fish out of water

(a) Ready to die

(b) In the absence of something

☒ (c) In unfamiliar circumstances

(d) Feeling sick

Can't cut the mustard

(a) To win a victory

~~(b) To be unable to do a job~~

(c) To be successful

(d) To render a service

29/30 | 02 May
April

Hit the nail on the head

- (a) Say or do something exactly right
- (b) Hurt a person by telling the truth
- (c) Drive a nail into a wall
- (d) Punish someone for a heinous crime

To leave no stone unturned

(a) to comprehensively arrange things

(b) to fully revise something produced

(c) to completely renovate an old building

✓ (d) to make all possible efforts

you
variable

world
fixed

to pigeon hole

(a) To blindly accept someone

✓ (b) To typecast someone *unfairly categorize*

(c) To call someone names

(d) To hurriedly reject someone

Synonym of -

Absurd \longrightarrow unreasonable / illogical.

(a) meaningful \longrightarrow

✓ (b) ridiculous

(c) important \Rightarrow

(d) rational \longrightarrow logical \Rightarrow

Synonym of -

Cordial

- ☒ (a) friendly
- ☐ (b) Cold
- ☐ (c) rude
- ☐ (d) aloof

Synonym of –

Sumptuous → expensive / lavish

(a) bereft → lacking something

(b) stingy → cheap

(c) meager → scanty / less / poor

~~(d) opulent~~ → luxury / wealth.

Assault \Rightarrow violent attack

~~(a) retreat~~ \Rightarrow back off

(b) affront \Rightarrow insult

(c) attack \Rightarrow

(d) pacify \Rightarrow calm down / bring peace

synonym

Spot the error

Before take this medicine you should consult a doctor.

taking

- ~~(a) Before take~~
- (b) a doctor
- (c) this medicine
- (d) you should consult

The reason was that
that

Spot the error

The reason for visiting Meerut was because my mother
needed to be looked after.

(a) The reason for visiting

~~(b)~~ was because

(c) to be looked after

(d) my mother needed

Spot the error

→ one - singular
→ plural.

[No one] have ever visited this place before.

has ⇒ singular
have ⇒ plural.

(a) visited this

(b) No one

(c) place before

✓ (d) have ever

Spot the error

She is not as smart as I think at first. *→ thought*

(a) as smart as

(b) I think

(c) at first

(d) She is not

Spot the error

if

As such you need any money, just write to me.

~~(a)~~ As such you

(b) to me

(c) need any money

(d) just write

He obtained 80% marks in science in High school. He has qualified _____ the science stream in plus two.

- (a) at
- (b) to
- (c) in
- (d) for

preposition.

This is the girl who is going to IIT, Delhi.

(a) whom

(b) that

~~(c) who~~

(d) which

If only we had a light! It is depressing to wait in the dark.

(a) have had

(b) are having

(c) have

~~(d) had~~

We haven't been to Gangotri for almost ten years.

(a) for

(b) from \longrightarrow time

(c) to

(d) since \longrightarrow specific date

← Comparative

Milk is _____ than any other food.

- (a) as nourishing
- ~~(b) more nourishing~~
